EDUCATION

Nepal Engineering College 2022–2026
Bachelor of Computer Science and Engineering

EXPERIENCE

SEED – Synergy Engineering and Environmental Development (P) Ltd. May–Aug 2026
Software Engineering Intern

Survey App – Forest Research and Training Centre *Next.js, PostgreSQL*

- Co-developed FRTC's field survey application to digitize data collection, reduce paper-based workflows, and support offline field operations in remote areas of Nepal. Conducted field surveys with the team and enhanced the application's data and image management capabilities for systematic tree-species documentation.

GIWMS – Kathmandu Valley Development Authority *DoIT website templates*

- Contributed to the development and content integration of Velpa's government information portal, structuring and publishing institutional data within standardized DoIT templates and validating content across the live platform.

RESEARCH PUBLICATION

Ayush Dev. "EchoTrace: A Controlled Benchmark and Simulation Study of Source-Family Dependence." *Research manuscript*, 2026.

- Introduces EchoBench-Synthetic v1.1, a reproducible 2,640-case benchmark, and EchoGraph, an interpretable model for identifying evidence sources that share the same informational origin and preventing false corroboration in AI-assisted research.

PROJECTS

AI Study Assistant *React, Flask, Gemini, ChromaDB*

- Developed a full-stack AI-powered learning platform for engineering students, integrating personalized study assistance, exam preparation, progress tracking, coding practice, and career guidance. Leveraged course materials and syllabus context to deliver personalized learning support, intelligent study tools, and actionable insights into student progress.

Pasale *Flutter, Dart*

- Built a retail platform to digitize Nepal's largely offline retail ecosystem, designed for a market of **300,000+ local stores**. Combines real-time inventory management, sales tracking, and actionable analytics to turn retail data into valuable market insights for FMCG companies.

Pregnify *React, Flask, SQLite*

- Developed a pregnancy care application integrating health tracking, appointment scheduling, and doctor–patient communication to streamline prenatal care management through a unified platform.

Issue Tracker *MongoDB, Express, React, Node.js*

- Developed for **Career Climber with eSewa – Batch 2**, giving teams one place to report bugs, organize tasks, and monitor progress.

Unsaid *Next.js, TypeScript, Supabase*

- Created an anonymous platform for people to express feelings they find difficult to share and read others' emotional experiences; reached **110 active users**.

NepaBhasa *Flutter, ElevenLabs, PyTorch*

- Co-developed a language-preservation app helping tourists communicate with local communities through Nepali and underrepresented local languages.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, Dart, SQL
Development: React, Next.js, Node.js, Express, Flask, Flutter, REST APIs, HTML/CSS
Data & Tools: PostgreSQL, MySQL, MongoDB, SQLite, Supabase, Firebase, Git, Docker, Linux

LEADERSHIP

Technical Lead, Computer Engineering Student Society (CoESS) 2024–2026
Organized a **48-hour hackathon** and led technical workshops at Nepal Engineering College.

Technical Lead Volunteer, SCAEF Nepal 2026

Core Member, AWS Cloud Club, Nepal Engineering College 2025–2026

Technical Lead, Hult at NEC 2025–2026

AWARDS

Fintech Track Winner – MBMC IdeaX 2025
Second Runner-Up – Hack For Business Hackathon 2025, Kathmandu University
Second Position – ITMeet 2025, Kathmandu University
